

Rajani Reddy

Angular Developer | Frontend Engineer Angular | TypeScript | RxJS | NgRx
Email ID: <mailto:rajaniy0571@gmail.com> | +91 9346121463

Career Abstract:

- Around **4+ years of professional experience** in designing, developing, and maintaining **scalable, responsive, and high-performance web applications** using **Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, and SCSS**.
- Strong expertise in developing **Single Page Applications (SPA)** using **Angular** with **component-based architecture, reusable UI components, and modular application design**.
- Proficient in Angular framework features, including **Components, Modules, Services, Directives, Pipes, Dependency Injection, Routing, Lazy Loading, Guards, Interceptors, Reactive Forms, and Standalone Components**.
- Extensive experience in building **responsive and user-friendly interfaces** using **Angular Material, Bootstrap, CSS3, and modern UI/UX design principles**.
- Hands-on experience in implementing **state management solutions** using **RxJS and NgRx (Store, Effects, Actions, Selectors)** for complex enterprise applications.
- Strong experience in integrating **RESTful APIs, WebSocket services, and backend microservices** to deliver **real-time and data-driven applications**.
- Experience in implementing **authentication and authorization mechanisms** using **JWT, OAuth 2.0, Role-Based Access Control (RBAC), Route Guards, and secure session management**.
- Skilled in developing **dynamic dashboards, analytical reports, KPI visualizations, and real-time monitoring systems** using **Highcharts, Chart.js, and AG Grid**.
- Experience in building **complex forms** using **Reactive Forms and Template-Driven Forms** with **custom validations, error handling, and business rule implementation**.
- Strong understanding of **asynchronous programming, RxJS Observables, Subjects, BehaviorSubjects, and reactive programming techniques**.
- Experience in implementing **enterprise-level business workflows, approval processes, notification systems, alert management, and operational dashboards**.
- Hands-on experience with **API integration, data transformation, client-side caching, pagination, filtering, sorting, and data visualization techniques**.
- Good knowledge of **Java, Spring Boot Microservices, Spring Security, REST APIs, and microservice architecture**.
- Experience working with **PostgreSQL, MySQL, Oracle Database, MongoDB, and Redis**.
- Familiarity with **Microsoft Azure, Azure DevOps, Docker, Kubernetes, CI/CD Pipelines, and containerized deployments**.
- Experience in developing and maintaining **scalable applications** following **software engineering best practices, design patterns, coding standards, and clean code principles**.
- Strong experience in **Unit Testing, Integration Testing, Jasmine, Karma, Jest, Cypress, and SonarQube** to ensure **high-quality software delivery**.
- Proficient in **Git, GitHub, GitLab, Bitbucket, Azure Repos, version control, and code review processes**.
- Experience in **monitoring, troubleshooting, debugging, and performance optimization** using **browser developer tools, logging frameworks, and performance analysis techniques**.
- Worked extensively in **Agile Scrum** environments, participating in **Sprint Planning, Daily Standups, Backlog Grooming, Retrospectives, Story Estimation, and Release Management**.

- Strong **analytical, problem-solving, communication, and team collaboration skills** with the ability to work effectively with **cross-functional teams and stakeholders**.
- Committed to delivering **high-quality, scalable, secure, and maintainable applications** aligned with **business objectives and user requirements**.
- Experience in implementing **Micro Frontend Architecture** and **Module Federation** to build scalable and independently deployable frontend applications.
- Hands-on experience in developing Server-Side Rendering (**SSR**) applications using Angular Universal to improve Application Performance, SEO, and User Experience.
- Experience in building Progressive Web Applications (**PWA**) with Service Workers, Offline Capabilities, Caching Strategies, and app-like user experiences.
- Strong understanding of Web Accessibility (**WCAG 2.1**) standards, including Semantic HTML, ARIA Attributes, Keyboard Navigation, Screen Reader Compatibility, and Inclusive UI Design.
- Strong expertise in Performance Optimization techniques, including Lazy Loading, Code Splitting, Tree Shaking, Bundle Optimization, OnPush Change Detection, Lighthouse Optimization, and Core Web Vitals improvements.
- Experience in developing Responsive and Cross-Browser Compatible Applications using Angular Material, Bootstrap, HTML5, CSS3, SCSS, and modern UI/UX Design Principles.

Technical Competencies:

Frontend Technologies	Angular 17, TypeScript 5.x, JavaScript (ES6+), RxJS, NgRx (Store, Effects, Selectors, Actions), Angular Material, HTML5, CSS3, SCSS, Bootstrap 5, Angular CDK, Reactive Forms, Template-Driven Forms, Angular Routing, Lazy Loading, Standalone Components, Angular Signals, Dependency Injection, Pipes, Directives, Guards, Interceptors
UI Components & Visualization	Angular Material Components, AG Grid Enterprise, Highcharts, Chart.js, Data Tables, Dynamic Forms, Custom Reusable Components, Dashboard Widgets, KPI Cards, Progress Indicators, Responsive Layouts
State Management	NgRx Store, NgRx Effects, NgRx Entity, RxJS Observables, Subjects, BehaviorSubject, ReplaySubject, State Synchronization, Memoized Selectors
API & Integration	RESTful APIs, HTTP Client, WebSocket, Server-Sent Events (SSE), Swagger/OpenAPI, API Gateway Integration, GraphQL APIs
Authentication & Security	JWT Authentication, OAuth 2.0, OpenID Connect (OIDC), Role-Based Access Control (RBAC), Authentication & Authorization, Route Guards, Session Management, Token-Based Security, Permission-Based UI Rendering, Data Encryption, Audit Logging
Backend Technologies	Java 17, Spring Boot Microservices, Spring Security, Spring Cloud, Node.js Services, Kafka Event Streams
Databases	PostgreSQL, MySQL, Oracle Database, MongoDB, Redis Cache
Containerization & Orchestration	Docker, Kubernetes, Helm Charts, Container Registry
CI/CD & Version Control	Azure DevOps Pipelines, Jenkins, GitHub Actions, Git, GitLab, Bitbucket, Continuous Integration (CI), Continuous Deployment (CD)

Testing Frameworks	Jasmine, Karma, Jest, Cypress, Selenium, Unit Testing, Integration Testing, End-to-End Testing (E2E), Code Coverage Analysis
Code Quality Tools	SonarQube, ESLint, Prettier
Monitoring & Logging	Application Insights, ELK Stack (Elasticsearch, Logstash, Kibana), Splunk, Grafana, Prometheus, Centralized Logging
Development Tools	Visual Studio Code, IntelliJ IDEA, Postman, Swagger UI, npm, Node.js, Webpack, Vite, Chrome DevTools, Figma
Methodologies	Agile Scrum, Sprint Planning, Daily Standups, Backlog Grooming, Story Point Estimation, Code Reviews, Peer Reviews, Release Management, Software Development Life Cycle (SDLC)
Domain Expertise	Industrial IoT (IIoT), Equipment Monitoring, Fleet Management, Remote Operations, Predictive Maintenance, Asset Tracking, Telemetry Analytics, Operational Dashboards, Safety Monitoring Systems

Organizational Experience:

Company:	HCL Technologies(Bangalore)				
Designation:	Software Engineer				
From:	JAN 2022	To:	FEB 2026	Duration: 4+ years	

Project Details:

Project Title:	HCL Technologies				
Client:	Caterpillar				
Role:	Angular Developer				
From:	JAN 2022	To:	FEB 2026	Duration:	4+ Years
Description:	Developed a web-based Remote Equipment Monitoring and Control Platform for Caterpillar heavy machinery used in hazardous industrial environments such as steel plants, mining sites, and manufacturing facilities. The application enables operators and supervisors to remotely monitor equipment status, machine health, operational telemetry, alerts, safety conditions, and real-time performance metrics. The platform provides centralised dashboards for remote operations, maintenance tracking, predictive analytics, safety monitoring, and equipment utilisation reporting.				
Team Size:	6				

Responsibilities:	• Developed responsive Single Page Applications (SPA) using Angular and TypeScript for real-time machine monitoring and control systems. • Designed and implemented reusable Angular components, directives, pipes, and services following component-driven architecture. • Developed real-time dashboards displaying machine telemetry, engine temperature, hydraulic pressure, fuel consumption, operating status, and safety indicators. • Integrated RESTful APIs and WebSocket communication for live machine status updates and event-driven notifications. • Implemented role-based authentication and authorisation using JWT and route guards to secure machine operations. • Built dynamic data visualisation dashboards using Highcharts and Angular Material to display operational KPIs and equipment performance trends. • Developed configurable alert management modules for critical machine conditions, including overheating, low hydraulic pressure, emergency shutdown events, and communication failures. • Implemented NgRx state management for handling complex application state and real-time equipment data synchronisation. • Developed maintenance scheduling modules allowing supervisors to monitor equipment service intervals and maintenance history. • Optimised application performance using lazy loading, route preloading strategies, code splitting, and OnPush change detection. • Built advanced filtering, sorting, and reporting functionality using AG Grid for equipment inventory and operational reports. • Integrated notification services for machine warnings, fault conditions, and preventive maintenance alerts. • Collaborated with backend teams for API design, data contracts, and telemetry integration. • Participated in Agile ceremonies including sprint planning, backlog grooming, code reviews, and release deployments. • Developed unit test cases using Jasmine and Karma and maintained code quality through SonarQube analysis.
--------------------------	--

	• Managed CI/CD deployment pipelines using Azure DevOps and Jenkins. Achievements: • Improved operator visibility into machine operations through real-time telemetry dashboards. • Reduced equipment monitoring delays by implementing WebSocket-based live updates. • Enhanced application performance by reducing page load time through lazy loading and optimised bundle generation. • Increased system reliability through automated alerting and safety monitoring capabilities. • Delivered scalable UI architecture supporting multiple equipment categories and industrial environments.
Environment:	Angular 17, TypeScript, RxJS, NgRx, Angular Material, HTML5, CSS3, SCSS, REST APIs, WebSocket, Highcharts, AG Grid, JWT, Azure DevOps, Git, Jenkins, SonarQube

ANGULAR VERSION EXPERIENCE

- Angular 8 – Developed component-based applications using Services, Routing, Dependency Injection, Forms, and REST API Integration.
- Angular 10 – Implemented Lazy Loading, Reactive Forms, RxJS, Angular Material, and Performance Optimization techniques.
- Angular 12 – Developed enterprise applications using reusable components, Route Guards, Interceptors, and advanced API integrations.
- Angular 14 – Worked with Typed Forms, Standalone Components, Dynamic Forms, and enhanced Angular architecture patterns.
- Angular 16 – Implemented Angular Signals, improved Dependency Injection patterns, and application performance enhancements.
- Angular 17 – Developed modern applications using Standalone APIs, Signals, New Control Flow Syntax (@if, @for), Deferrable Views, and optimized rendering techniques.

CERTIFICATIONS

- Advanced HTML5 Web Development Certification – HCL Technologies
- CSS3, SCSS & Responsive UI Development Certification – HCL Technologies
- Angular 17, TypeScript & JavaScript (ES6+) Development Certification – HCL Technologies

PORTFOLIO PROJECTS

Real Estate Management System | Angular, TypeScript, HTML5, CSS3, REST APIs

- Developed a web-based Real Estate Management application for property listing, search, and management.
- Designed responsive user interfaces using Angular and TypeScript.
- Implemented reusable Angular components and integrated RESTful APIs for dynamic data handling.
- Developed search, filtering, and property management modules following component-driven architecture.

Angular Products CRUD Application | Angular, TypeScript, RxJS, Angular Material

- Developed a Product Management application implementing Create, Read, Update, and Delete (CRUD) operations.
- Utilized Angular Services, Routing, Reactive Forms, and API Integration.
- Applied component-based architecture with form validations and reusable UI components.

Rent-A-Car Frontend Application | Angular, TypeScript, HTML5, CSS3, Bootstrap

- Developed a responsive vehicle rental application with a modern user interface design.
- Implemented vehicle listing, booking workflow, and customer interaction modules.
- Integrated frontend modules with backend APIs and optimized user experience across devices.

Angular Application Development | Angular, TypeScript, RxJS

- Developed modular Angular applications using reusable components, services, and dependency injection.
- Implemented routing, state management concepts, and reactive programming using RxJS.
- Followed Angular best practices, clean code principles, and responsive design standards.

Educational Qualifications:

- Bachelor of Engineering (Computer Science and Engineering), Rajeev Gandhi Memorial College of Engineering and Technology, AP
